

# FRUIT TREE CARE

A Proper Spraying Regiment  
Includes 6 Sprayings a Year to Control  
Insects & Diseases!

Fertilize in early spring with fruit tree  
spikes

## SPRAY STAGES:

- 1 Dormancy** Absence of growth- fall, winter, or early spring
- 2 Green Tip** When branch tips show green tissue
- 3 Pre-Bloom** When blossom buds show full color before opening

**NEVER SPRAY TREES IN BLOOM**

- 4 Petal Fall** When last petals have fallen from blossoms
- 5 1st Cover** 7-10 days after petal fall
- 6 2nd Cover to Harvest** 2 weeks after 1st cover spray. Repeat up to 2 weeks before Harvest if Desired
